

Use Dashboard Filters to Select CoC

## Racine City/County CoC

Selected CoC

# 37

per 10,000 CoC residents experienced homelessness

## State of Wisconsin

(for optional comparison to CoC rates)

# 36

per 10,000 Wisconsinites experienced homelessness

CoC Rate of Homelessness by Race, per 10,000

State Rate of Homelessness by Race, per 10,000

CoC Rate of Homelessness by Ethnicity, per 10,000

State Rate of Homelessness by Ethnicity, per 10,000

### Why Are there Racial Disparities in Homelessness?

A history of housing discrimination has contributed to the racial disparities in homelessness that we see today. [Check out this quick video for more about this history.](https://www.youtube.com/watch?v=JKteYKrR5E) <https://www.youtube.com/watch?v=JKteYKrR5E>

### How to Use this Dashboard

First, choose your HUD CoC and preferred Reporting Period using the filters. Then update the results.

The dashboard will display the overall rate of homelessness per 10,000 residents in your CoC. You can then compare this overall rate of homelessness with the rate of homelessness as the basis of comparison. Let's say the rate for White folks is lower than the rate for Black or African American folks. Divide the rate of homelessness for Black or African American folks (numerator) by the rate of homelessness for White folks (denominator). To describe the resultant rate: "Black or African American folks in my CoC are \_\_\_ times as likely to experiencing homelessness in the reporting period compared to white folks in my CoC."

### Additional Detail about data included in dashboard:

- Total population counts from US Census Bureau Decennial 2020 Census Count
- Total count of clients experiencing homelessness comes from programs that record data in HMIS. These counts include clients served in emergency shelter, safe haven, transitional housing, and PATH, ESG and City-funded Street Outreach programs. It also includes clients entering permanent housing programs.
- For visualizations by race/ethnicity, clients reporting unknown race or ethnicity are excluded. Census data include a "some other race" category, which is also excluded from this analysis.

Detail (Race)

	Race	Total Population	Clients in HMIS	Rate of Homelessness (per 10,000) by Race

### Data Included in Dashboard

Data in "All Clients Served by Race" visualization comes from programs that record data in HMIS. These counts include clients served in emergency shelter, safe haven, transitional housing, and PATH, ESG and City-funded Street Outreach programs. It also includes clients entering permanent housing programs.

All visualizations on this dashboard use CoC and Reporting Period filters to return results.

Project Type, Program Name, and Fund Source filters are optional and only apply to the two visualizations on the right.

### How to Use Dashboard

Use the CoC and Reporting Period Filters to choose your desired CoC and reporting period. Then use the remaining filters to look for racial disparities between program types, fund sources, or individual programs.

The visualization on the left, "All Clients Served by Race" is only affected by the CoC and Reporting Period filters, so it will remain as a reference point as you change the remaining filters and update the 2 graphs on the right.
